

Nova Hayes Rollout Training

Module 1 — Audience and Artist Positioning

10-Slide Production Script · April 2026

Adobe Captivate Build Reference

How to use this script

Every slide entry includes four sections.

ON SCREEN is the exact text the learner sees.

CAPTIVATE BUILD is the step-by-step production instruction.

MODALITY confirms what format the content takes — text only, graphic with audio, or interactive.

INCEPTION NOTE (flags if this slide plants a consequence that surfaces in a later module.)

Work through slides in order. Do not skip. Each slide is sequenced to reduce cognitive load and move the learner from orientation into active strategic thinking.

Module 1 at a glance

Module	Module 1 of 6 — Audience and Artist Positioning
Bloom's level	Remember and Understand — Tier 1
Learning objective	Identify the key indicators of an audience demographic mismatch by interpreting layered artist profile data and recognizing the gap between current audience and target audience
Five-step sequence	Identify the problem → Learn the concept → Troubleshoot with options → Apply the knowledge → Solve the task
Inception seed	The decision made on Slide 4 is stored and surfaces in Module 4 as a demographic consequence in the analytics dashboard
Total slides	10
Modality rule	Text only on all slides except Slide 3 which uses a graphic with audio narration
Captivate variable set	M1_Decision — value 1 for flagged, value 2 for absorbed

SLIDE 1 INTRO SCENARIO

Purpose

Drop the learner into the simulation before any instruction begins. Establish stakes, tone, and narrative frame. This slide should feel like a cold open — no theory, no setup. Just the situation.

ON SCREEN — TOP LEFT LABEL

Module 1 of 6 · Audience and Artist Positioning

ON SCREEN — MAIN TITLE

Day 1. You have a new client.

ON SCREEN — BODY TEXT

Her name is Nova Hayes. She is an emerging R&B and pop artist with 14K followers, a manager who wants a rollout plan by end of week, and an audience problem she does not know she has yet. You have 31 days. This is where you start.

ON SCREEN — BOTTOM PROMPT

Press Continue to begin.

BUILD NOTE Blank slide. Use centered Title with body text design option. Title at 36px. Body at 18px. Background F7F6F2. Continue button links to Slide 2. No audio. Learner paced.

MODALITY

Text only. No graphic present. No audio.

SLIDE 2 STRATEGIC PROBLEM

Purpose

Name the real problem before the learner sees the data. This activates prior knowledge and frames what they are about to investigate. Bloom's level: Identify.

ON SCREEN — TOP LEFT LABEL

The problem

ON SCREEN — MAIN TITLE

Not every audience is the right audience.

ON SCREEN — BODY TEXT

An artist can have thousands of followers and still be building toward the wrong room. Engagement rate tells you how active an audience is. It does not tell you who that audience is. Before you build a single piece of strategy, you need to know the difference between the audience Nova has and the audience she needs.

ON SCREEN — FRAMING QUESTION

As you look at Nova's data, ask yourself this: what would a healthy mismatch look like versus a dangerous one?

ON SCREEN — BOTTOM PROMPT

Press Continue to look at the data.

BUILD NOTE Blank slide. Title and body text design option. No graphic. No audio. Learner paced. This slide does the cognitive priming before the data arrives on Slide 3.

MODALITY

Text only. No graphic. No audio. Learner reads and advances.

SLIDE 3 CONCEPT PRIMER

Purpose

Introduce the concept of demographic match with a worked example before the learner sees Nova's actual data. This is the learn step of the five-step sequence. One graphic, audio narration explains it. No text on screen repeating the narration.

ON SCREEN — TOP LEFT LABEL

Concept primer · Demographic match

ON SCREEN — GRAPHIC DESCRIPTION

A side-by-side comparison of two artist profiles. Artist A has 20K followers and 4% engagement with 31% demographic match. Artist B has 8K followers and 9% engagement with 78% demographic match. A simple two-column visual — left column labeled Artist A, right column labeled Artist B. Each column shows the three stats as stacked text labels. No bar charts. No icons. Text and numbers only, laid out cleanly in two columns.

AUDIO NARRATION SCRIPT

Day 1. You are looking at two artists. Artist A has more followers and a lower engagement rate. Artist B has fewer followers and a higher engagement rate. But the number that actually matters is demographic match — the percentage of followers who fit the target audience. Artist A's audience is 69% wrong. Artist B's audience is 78% right. Fewer followers. Better fit. That is the foundation you build a rollout from. Keep that in mind when you look at Nova's numbers.

ON SCREEN — TEXT LABELS ONLY

Artist A · Artist B · Followers · Engagement · Demographic match

BUILD NOTE This is the only slide in Module 1 with audio. Use the graphic and insert a two-column layout using the multi-column content option. Place text labels only on screen — no full sentences. Record the narration script above using Audio Record to Slide. No captions. No redundant on-screen text repeating the narration. Chapter 7 and Chapter 8 modality rules apply here.

MODALITY

Graphic on screen plus audio narration. Text labels only — no full sentences. No captions. Audio narrates the graphic. Chapter 7 and 8 applied.

SLIDE 4 DECISION POINT

Purpose

This is the core decision of Module 1 and the Inception mechanic seed. The learner commits to a path. The choice is stored as a Captivate variable. It surfaces in Module 4 as a consequence in the analytics dashboard. No wrong answer — both paths teach something. The framing builds confidence in strategic reasoning, not test anxiety.

ON SCREEN — TOP LEFT LABEL

Your first decision

ON SCREEN — MAIN TITLE

Nova's data shows an 80% demographic mismatch. Her manager wants the rollout plan by end of week. What do you do?

ON SCREEN — SUPPORTING CONTEXT

80% of Nova's current followers are outside her target demographic. Her engagement rate looks healthy at 8.4%. But the audience engaging is not the audience her music is built for. The manager is not interested in delaying the rollout to address this.

ON SCREEN — OPTION A BUTTON

Raise the demographic mismatch with the manager before building the strategy

ON SCREEN — OPTION B BUTTON

Absorb it as a constraint and build the strategy around it

BUILD NOTE Blank slide. Text and two buttons from the interactive components panel. Button A links to Slide 5A. Button B links to Slide 5B. Both buttons same visual style. Set Captivate variable M1_Decision to 1 when A is clicked and 2 when B is clicked using advanced actions. No audio. Slide does not auto-advance. Learner must choose before proceeding.

INCEPTION SEED

M1_Decision variable set here. Module 4 reads this variable on the analytics dashboard slide to determine whether the demographic consequence appears as a surprise the learner did not anticipate or as a contingency they already planned for.

MODALITY

Text only. No audio. Decision prompt requires silence and space to think. Chapter 7 and Chapter 8.

SLIDE 5 RATIONALE REFLECTION

Purpose

Immediate feedback on the decision. Not a right or wrong label. A strategic diagnosis of what the choice means and what it costs. This is where the learner builds accurate mental representation of the decision — critical per Chapter 10. Two versions: 5A for Option A and 5B for Option B. Both advance to Slide 6.

Slide 5A — Option A feedback (flagged the mismatch)

ON SCREEN — TOP LEFT LABEL

You flagged it

ON SCREEN — MAIN TITLE

Good instinct.

ON SCREEN — BODY TEXT

You raised the demographic mismatch before building anything. The manager pushed back but you have the concern on record. A strategist who names the problem before it becomes a crisis is more valuable than one who avoids the difficult conversation to keep the peace. That said — flagging it does not fix it. The work still has to get done.

ON SCREEN — CONSEQUENCE PREVIEW

Remember this conversation. It will come back in Module 4.

BUILD NOTE Consequence preview line in color 5C5C5C — muted, not alarming. Continue button links to Slide 6. No audio.

Slide 5B — Option B feedback (absorbed as constraint)

ON SCREEN — TOP LEFT LABEL

You absorbed it

ON SCREEN — MAIN TITLE

That is a real strategist move.

ON SCREEN — BODY TEXT

Working within constraints rather than stopping to fight them is often the right call in this industry. The mismatch is still there but you have chosen to build around it. That decision has a cost and a benefit. You will feel both before this simulation is over.

ON SCREEN — CONSEQUENCE PREVIEW

The audience gap you chose not to address today will show up in your data in Module 4. Whether that becomes a problem or a manageable variable depends on every decision between now and then.

BUILD NOTE Same layout as 5A. Consequence preview in color 5C5C5C. Continue button links to Slide 6. No audio.

MODALITY

Text only on both 5A and 5B. No audio. Feedback is read, not heard. Learner paced.

SLIDE 6 TACTICAL EXECUTION

Purpose

Apply the concept. The learner now sees Nova's actual full profile data and must complete a structured diagnosis using the concept introduced in Slide 3. This is the apply step of the five-step sequence. The click-to-reveal widget built earlier is the right interaction here.

ON SCREEN — TOP LEFT LABEL

Apply what you know

ON SCREEN — MAIN TITLE

Now look at Nova's actual data.

ON SCREEN — SUBTITLE

Click each card to uncover what the data is telling you. Use the concept primer from Slide 3 to read these numbers.

CARD 1 LABEL

Surface data

CARD 1 OVERLAY

14K followers · TikTok primary · Instagram secondary · Posts 3 times per week · High watch time · Low profile visits

CARD 2 LABEL

Engagement data

CARD 2 OVERLAY

8.4% engagement rate · Saves are 3x higher than shares · Low conversion from viewer to follower · Audience skews outside target demographic

CARD 3 LABEL

The problem

CARD 3 OVERLAY

80% of Nova's current followers are outside her target demographic. The numbers look healthy. The audience is wrong. This is the gap your entire strategy has to account for.

BUILD NOTE Use the Click to Reveal widget. Three cards. Card 3 overlay uses accent color border 2D5BE3 to signal it is the most significant reveal. After all three cards are clicked a Continue button appears linking to Slide 7. No audio.

MODALITY

Text only on cards and overlays. No audio. The click-to-reveal interaction is behavioral engagement that requires selection and integration per Chapter 10.

SLIDE 7 IMMEDIATE OUTCOME

Purpose

Surface the immediate result of the diagnostic exercise. This is not consequences yet — those come in Slide 8. This slide closes the diagnosis loop and names what the learner has just confirmed. Straight, direct, professional.

ON SCREEN — TOP LEFT LABEL

What you just confirmed

ON SCREEN — MAIN TITLE

Nova has an audience problem, not a content problem.

ON SCREEN — BODY TEXT

Her content is working. Her engagement rate is real. But the people engaging are not the people her music is built for. That is not a posting frequency problem. That is not a platform problem. That is a positioning problem — and positioning is exactly what this module is about.

ON SCREEN — SECONDARY LINE

You have diagnosed the root issue. The next question is what you do with it.

ON SCREEN — BOTTOM PROMPT

Press Continue.

BUILD NOTE Blank slide. Title and body text. Clean and direct. No graphic. No audio. Continue links to Slide 8. Learner paced.

MODALITY

Text only. No audio. This is a confirmation beat — the learner reads and sits with the conclusion before moving forward.

SLIDE 8 DELAYED CONSEQUENCE SEED

Purpose

This is the Inception mechanic slide. The consequence of Slide 4 is foreshadowed clearly enough to register but not so explicitly that it removes the surprise in Module 4. The learner should feel a sense of weight — not alarm. This slide is the most pedagogically important slide in the module.

ON SCREEN — TOP LEFT LABEL

Before you move on

ON SCREEN — MAIN TITLE

Every positioning decision you make today has a number attached to it in 30 days.

ON SCREEN — BODY TEXT

The demographic mismatch you identified is not going away on its own. Whether you flagged it or absorbed it, it is now part of your rollout reality. The audience you build toward in the next four modules will either close this gap or widen it.

ON SCREEN — CONSEQUENCE FORESHADOW

When the analytics come back in Module 4, the number that matters will not be follower count. It will be demographic match percentage. Whatever it shows at that point traces directly back to the decisions you are making right now.

ON SCREEN — BOTTOM PROMPT

Press Continue.

BUILD NOTE Blank slide. Consequence foreshadow text in color 5C5C5C — present and legible but visually understated. This slide auto-advances after 10 seconds or learner presses Continue. No audio. The weight of this slide comes from the text, not production value.

INCEPTION MECHANIC

M1_Decision variable already set on Slide 4. This slide reinforces that a consequence is coming without revealing what it is. Module 4 Slide 3 reads M1_Decision and branches the analytics reveal accordingly. If value is 1 the learner sees a contingency they planned for. If value is 2 the consequence surfaces as a harder surprise.

MODALITY

Text only. No audio. Silence is intentional here. The learner sits with the weight of the foreshadow.

SLIDE 9 DEBRIEF

Purpose

Close the learning loop. Name the principle, connect it to the decision, and frame it as something the learner will carry forward. The debrief is not a summary. It is a teach-back — the learner is asked to articulate the principle in their own words before seeing it stated. Chapter 10 engagement principle applied.

ON SCREEN — TOP LEFT LABEL

Debrief

ON SCREEN — MAIN TITLE

Before we name the principle, you name it first.

ON SCREEN — TEACH-BACK PROMPT

Based on everything you just worked through, complete this sentence in the text field below:

ON SCREEN — SENTENCE STARTER

The most important thing a strategist checks before building a rollout is...

ON SCREEN — TEXT ENTRY FIELD

[Learner types their response here]

ON SCREEN — PRINCIPLE REVEAL — APPEARS AFTER SUBMISSION

The audience you have is not always the audience you need. Strategy starts with that gap.

ON SCREEN — BOTTOM PROMPT

Press Continue to see your Module 1 dashboard.

BUILD NOTE Use a short answer question slide for the text entry. After submission the principle reveal appears as a text block below the entry field — use a conditional show action triggered by the submit button. Principle text in color 2D5BE3 to distinguish it visually from the prompt. Continue links to Slide 10. No audio.

MODALITY

Text only. Learner types. Principle is revealed as text. No audio. Teach-back format activates generative processing per Chapter 10.

SLIDE 10 DASHBOARD

Purpose

Close Module 1 with a visual summary of what was decided, what was learned, and what is coming. The dashboard is the learner's record of the module. It shows progress, confirms the principle, names the consequence seed, and bridges to Module 2. This is the payoff for completing the module.

ON SCREEN — TOP LEFT LABEL

Module 1 complete · Audience and Artist Positioning

ON SCREEN — MAIN TITLE

Here is where you stand.

DECISION MADE

You chose to [flag the mismatch / absorb it as a constraint] — shown dynamically based on M1_Decision variable

PRINCIPLE EARNED

The audience you have is not always the audience you need. Strategy starts with that gap.

WHAT YOU DIAGNOSED

Nova has 14K followers, 8.4% engagement, and 80% demographic mismatch. A positioning problem, not a content problem.

WHAT IS COMING

Module 2 — Platform and Content Strategy. The decisions you make there will either close the gap you found here or make it harder to close later.

ON SCREEN — CONSEQUENCE SEED REMINDER

Your Module 4 analytics will reflect the positioning decisions you made today. The variable is already set.

ON SCREEN — CONTINUE BUTTON

Continue to Module 2

BUILD NOTE Blank slide. Use two side-by-side two-column layout blocks for the four data points. The decision made field should display dynamically using the M1_Decision variable — if value is 1 show flagged the mismatch, if value is 2 show absorbed as constraint. Use a conditional text block with show/hide advanced

actions triggered on slide entry. Continue button links to Module 2 Slide 1. No audio. This slide is the one your professor and classmates will screenshot for GitHub — make it look polished.

MODALITY

Text only. No audio. The dashboard is a visual record the learner reads at their own pace. Clean layout is the production priority here.

Production checklist — Module 1

Confirm every item before previewing the full module in Captivate.

S1	Intro scenario	Continue links to Slide 2. Background F7F6F2. No audio.
S2	Strategic problem	Continue links to Slide 3. No audio. Learner paced.
S3	Concept primer	Two-column graphic present. Audio recorded and attached. No captions. Text labels only on screen.
S4	Decision point	Button A links to 5A. Button B links to 5B. M1_Decision variable created. Advanced actions set and tested. No audio.
S5A	Rationale — Option A	Continue links to Slide 6. Consequence preview in color 5C5C5C. No audio.
S5B	Rationale — Option B	Continue links to Slide 6. Consequence preview in color 5C5C5C. No audio.
S6	Tactical execution	All three Click to Reveal cards populated. Card 3 overlay accented. Continue appears after all three clicked. No audio.
S7	Immediate outcome	Continue links to Slide 8. No audio. Clean text layout confirmed.
S8	Consequence seed	Foreshadow text in 5C5C5C. Auto-advances after 10 seconds or Continue pressed. No audio.
S9	Debrief	Text entry field working. Principle reveal fires on submission. Continue links to Slide 10. No audio.
S10	Dashboard	Dynamic M1_Decision text confirmed working. All four data points visible. Continue links to Module 2.
